

Transitions® fits your style!

And let's you see life, as it's meant to be seen!

Transitions lens fit all most any frame, so no matter what your style you can see life as it was intended to be seen!

With Chromatic Colour Adaption technology they'll give you superior, more natural vision without compromise.

Whether your inside or out they're the lenses that quickly adjust from clear to dark and every shade in between, then back again.

Transitions®
ADAPTIVE LENSES™

Our Newest, Most Responsive Adaptive Lenses

Fully clear indoors - but outside, they're more responsive than ever thanks to our exclusive Chromea7™ photochromic technology.

They are more reactive to UV light so they get darker in more conditions, including bright sun, partially sunny, cloudy, and everything in between. They also adapt to indirect light - such as light reflected from buildings, cars, and many other surfaces.

- Fit any prescription and frame.
- Fully clear indoors and at night.
- Fast fade back speed.
- Block 100% of UVA & UVB rays.
- Suitable for any age including children.
- Range of lense colours to suit you.
